

Brüche 6

Addieren und Subtrahieren (ohne gemeinsamen Nenner)

1. Addieren (Kürze wenn möglich!)

$$\frac{1}{4} + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$\frac{1}{6} + \frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$\frac{1}{2} + \frac{4}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$\frac{2}{6} + \frac{2}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

2. Subtrahieren (Kürze wenn möglich!)

$$\frac{1}{2} - \frac{4}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$\frac{2}{3} - \frac{3}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$\frac{5}{6} - \frac{2}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$\frac{7}{10} - \frac{4}{11} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$$
